

# Shubham Chauhan

☎ +91-6392129425 ✉ shubham639212@gmail.com 🐙 github.com/shubh5666 🌐 linkedin.com/in/shubhamchauhan5666

## Education

### Indian Institute of Technology, Guwahati

B.Sc. (Hons.) Data Science and Artificial Intelligence — CGPA: 7.81/10

2023 – Present

Guwahati, India

## Experience

### Init Lync Technologies

Mar 2026 – May 2026

Software Engineering Intern (Backend)

- Developed and deployed **15+** RESTful API endpoints using Node.js and Express.js, enabling efficient data synchronization across a high-traffic multi-user application.
- Implemented secure JWT authentication and Role-Based Access Control (RBAC) to manage user permissions.
- Designed scalable MongoDB schemas using Mongoose to maintain data consistency and optimize query performance under high traffic.
- Developed modular backend features using MVC patterns and custom middleware for centralized error handling.

### SYNC AI Technologies Pvt Ltd

Nov 2025 – Feb 2026

Full Stack Developer Intern

- Built and optimized RESTful API endpoints using Node.js and Express.js to streamline backend routing and data transfer.
- Developed responsive React.js components and integrated them seamlessly with backend API services.
- Implemented CRUD operations and designed structured Mongoose models for robust MongoDB data storage and management.
- Collaborated within an agile team of **5** developers using Git and GitHub for version control and sprint tracking.

## Projects

### DevTinder - Developer Networking Platform

Live | [GitHub](#)

- Built a full-stack developer platform capable of handling **20+** concurrent Socket.IO connections.
- Implemented secure JWT authentication and HTTP-only cookies to fully protect user sessions.
- Developed real-time messaging with Socket.IO, achieving a low-latency sub-**100ms** message delivery via event-driven communication.
- Designed and integrated 15+ RESTful API endpoints for profile management and networking features.

### Examify - Online Examination Platform

Live | [GitHub](#)

- Built a type-safe multi-page client application using React, Vite, and TypeScript to ensure strict compile-time error checking.
- Implemented explicit client-side routing logic and component state tracking to smoothly handle simulated exam workflows.
- Configured linting and compiler rules with tsconfig and eslint to maintain strict code quality standards across the workspace.
- Utilized the Bun package engine to manage dependencies and optimize local development bundling and compilation **speeds**.

### AI-Meeting-Assistant - Meeting Intelligence Engine

Live | [GitHub](#)

- Architected a secure backend using Node.js and Express.js, enforcing strict JWT authentication to protect 100% of endpoint routes.
- Engineered asynchronous API pipelines to process 5+ concurrent audio file uploads smoothly without blocking the server event loop.
- Integrated AssemblyAI and Groq API pipelines to process audio and generate structured summaries in under **30 seconds**.
- Deployed the application across Render and Vercel cloud platforms, configuring deployment environments and CORS security.

## Technical Skills

- |                                                                              |                                                                                                   |
|------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| • <b>Programming:</b> JavaScript, C++, Python, SQL                           | • <b>Databases:</b> MongoDB, MySQL, Mongoose                                                      |
| • <b>Frontend:</b> HTML, CSS, React.js, Tailwind CSS                         | • <b>Core CS:</b> Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks |
| • <b>Backend:</b> Node.js, Express.js, REST APIs, JWT, Socket.IO, WebSockets | • <b>Tools:</b> Git, GitHub, Postman, npm                                                         |

## Relevant Coursework

**Software Systems:** Advanced Programming, Object-Oriented Design, Database Systems, Systems Design

**Data Science & AI:** Machine Learning Fundamentals, Data Analysis, Statistical Methods, Artificial Intelligence

**Mathematics:** Linear Algebra, Probability and Random Processes, Discrete Mathematics, Calculus

## Achievements

- Solved **300+** Data Structures and Algorithms problems across LeetCode and Codeforces.
- Advanced to Round 2 of the Polaris Fellowship 2026, selected from thousands of applicants nationwide.

## Certificates

- **Artificial Intelligence Fundamentals** – Verified ([Link](#))
- **JPMorgan Chase Software Engineering Virtual Experience** (Forage) – ([Link](#))
